

Spende Popper – Banflab / Last Show

(music: Banflab Theme)

Dc: This section of our show is brought to you by Spende-Popper, maker of Banflab. Is Banflab Right for you? Ask your doctor! It's easy. Just turn and say ... Doctor?

Tk: (*rushed*) Yes, I'm your doctor. What do you want?

Dc: Um. Some personal attention?

Tk: Ambitious, are we? Do you have your chart with you?

Dc: I have it right here. And I have a question.

Tk: Good. I'll make some noises to give you the impression I'm listening, OK?

Dc: I saw an ad that showed people my age bungee jumping from helicopters ... and they'd been taking Banflab and that's how they got the courage. And I thought maybe Banflab is right for me, so I'm asking you.

Tk: Um-Hmmmm. Do you ever have the urge to take part in risky behaviors? Something outrageous?

Dc: Yes! Bungee jumping from helicopters! But I don't know if I have that much confidence in myself. That's why I want Banflab!

Tk: I think you'd need to have more confidence that your pilot will get the altitude right. Maybe I should prescribe something for HIM. Or HER.

Dc: I don't even know what Banflab does.

Tk: You want to try it but you don't know what it does?

Dc: Well, they said to ask you.

Tk: WHO said?

Dc: The people on TV.

Tk: TV? I'm very glad we had this talk. I've been your doctor for ... 25 years ... and I had no idea you were looking for medical and lifestyle advice on television.

Dc: I said ... because they were having so much fun, or seemed to be ... I wanted to be like the TV people!

Tk: I thought you were smarter than that, but now I can tell you're wide open to suggestion.

Dc: Is that a good thing?

(sfx: writing) LIVE

Tk: No. That's why I'm prescribing Neutra-Chump.

Dc: Neutra-Chump? I didn't ask for that!

Tk: Who's your doctor, eh? It's me!
And I think taking Neutra Chump will help you stay skeptical. Do you believe me?

Dc: Uh, yeah.

Tk: Then it's worse than I thought. Take one Neutra Chump twenty minutes before you sit down to watch TV,

Dc: But what about Banflab!

Tk: You don't need Banflab, all it does is ... it gets you to talk to your doctor. And you've done that. Good job.

Dc: He's right. Since I talked to my doctor about Banflab, he knows me better ... and I have a huge stockpile of Neutra Chump.

(music: end theme)

Tk: It neutralizes the chump reflex that makes you respond automatically when you see a drug ads on TV!
Believe me, you need it by the barrelful.

Dc: Banflab, Neutra Chump, Perplex, Span Pax and Flummox – from Spende Popper, the drug company.
What do they do? Ask your doctor! I did!
